

Serial No.: 10/586,428

AMENDMENT TO THE SPECIFICATION

Please add the following paragraph after the first paragraph on page 9 of the Substitute Specification.

A tool holder arrangement in accordance with this invention can have at least one liquid spray device, representatively illustrated as spray device 50, assigned to the chisel holder, which introduces liquid into the chisel receiver through the opening. Then the liquid dissolves the removed material collecting in the chisel receiver, so that it can be easily removed through the opening.
